ELSEVIER

Journal of Materials Processing Technology 61 (1996) 397–399

Journal of Materials Processing Technology

Contents of Volume 61

An improved ART neural net for machine cell formation 1
D.-S. Chen, H.-C. Chen, J.-M. Park (Tuscaloosa, AL, USA)

A knowledge-based system for the automatic generation of PCB alternative designs 7
C. Castillo, C.O. Malavé (College Station, TX, USA)

Error compensation of coordinate measurements in computer-integrated manufacturing using neural networks 12
Y. Shen, S. Moon (Washington, DC, USA)

An intelligent software system for a robotics assembly cell 18
H. Najjari, S.J. Steiner (Birmingham, UK)

Direct digital control of environmentally isolated seafood manufacturing systems 27
J. Richard Booth, P.B. Kondapi (Cookeville, TN, USA)

Process monitoring of 3D-cutting inserts using optical methods 34
J. Leopold (Chemnitz, Germany)

An integrated model for manufacturing process improvement. 39
W.K.C. Yung (Hung Hom, Hong Kong)

Using evolution strategies and simulation to optimize a pull production system 47
J.D. Hall, R.O. Bowden, J.M. Usher (Mississippi State, MS, USA)

Dynamic process planning - the static phase. 53
J.M. Usher, K.J. Fernandes (Mississippi State, MS, USA)

Process optimisation in forming technology 59
T. Schaller, J. Reissner (Zürich, Switzerland)

Computer aided curvature analysis along the contact line of conjugate helical surfaces 67
Da Zhun Xiao, Dong Tao Liu, Zhi Qiang Wang, Dian Min Liu (Delian, China)

Computer aided design software package for conjugate helical surfaces 72
Da Zhun Xiao, Ke Bing Li, Zhi Qiang Wang, Dian Min Liu (Delian, China)

The potential to exchange feature models with user defined feature libraries. 78
A.G. Pedley (Edinburgh, UK)

Integrating CAD/CAM software for process planning applications. 87
K.K. Thomas (Burr Ridge, IL, USA), G.W. Fischer (Iowa City, IA, USA)

Direct interface integration of CAD and CAM software - a milling approach 93
V. Srinivasan (North Liberty, IA, USA), G.W. Fischer (Iowa City, IA, USA)

Architecture for agile manufacturing and its interface with computer integrated manufacturing 99
Z.Y. Wang, K.P. Rajurkar, A. Kapoor (Lincoln, NE, USA)

An integrated CAD/CAM system for automated composite manufacture 104
Z. Zhang (Liverpool, UK), M. Sarhadi (Uxbridge, UK)

(PPP): A hybrid system for integrating process and production planning in batch part manufacturing 113
A.E. ElSayed, M.H. Elwany (Alexandria, Egypt)

Development of an interface between a supervisory shop controller and MRP system in a CIM environment. 120
W.F. Erevelles (Flint, MI, USA), S.K. Aithal (Bangalore, India)

Process capability modelling in an integrated concurrent engineering system - the feature-oriented capability module 124
J.C. Naish (Dundee, UK)

Intelligent concurrent manufacturability evaluation of design for electrochemical machining 130
M.S. Amalnik (Paisley, UK), J. A. McGeough (Edinburgh, UK)

Hypermedia as a tool with application to computer integrated design and manufacturing 143
K. Cheng (Glasgow, UK)

A general methodology for developing intelligent CAE systems - a model-based reasoning approach. 148
W.J. Zhang, D. Zhang (Hong Kong)

Design principles for the architecture of tool integration software environment: in the case of production machines design 154
W.J. Zhang, D. Zhang (Hong Kong)

Creating a database of rapid prototyping system capabilities 163
R.I. Campbell, M.R.N. Bernie (Nottingham, UK)

Issues in fabricating manufacturing tooling using powder-based additive freeform fabrication 168
B.K. Paul (Corvallis, OR, USA), S. Baskaran (Washington, DC, USA)

Investigation of the effect of various build methods on the performance of rapid prototyping (stereolithography) 173
R.E. Williams, S.N. Komaragiri, V.L. Melton, R.R. Bishu (Lincoln, NE, USA)

Concurrent engineering and product specification. 181
A.R. Young, N. Allen (Edinburgh, UK)

An interactive system for optimum and concurrent design of components for manufacture by powder metallurgy technology. 187
L.N. Smith, P.S. Midha (Bristol, UK)

A framework for an integrated quality system 195
J.A. Heredia (Castellón, Spain), Ip-Shing Fan (Cranfield, UK), F. Romero (Castellón, Spain), P. Rosado (Valencia, Spain)

Benchmarking the application of quality function deployment in rapid prototyping 201
B. Ghahramani (Rolla, MO, USA), A. Houshyar (Kalamazoo, MI, USA)

Management information systems: do they give manufacturing organisations what they want? 207
D. Wybrow, P. Cameron-MacDonald (Edinburgh, UK)

Increase the efficiency of an FMS by improving the tool scheduling strategies 213
X.N. Li (Nanjing, People's Republic of China), E.H.M. Cheung, K.B. Chuah (Kowloon, Hong Kong)

Computer aided cutting process parameter selection for high speed milling. 219
A. Kaldos, I.F. Dagiloke, A. Boyle (Liverpool, UK)

Integrated tool life prediction and management for an intelligent tool selection system 225
P.G. Maropoulos, B. Alamin (Durham, UK)

Developing new trends of cutting tool geometry 231
I.A. Kattan, K.R. Currie (Cookeville, TN, USA)

The influence of fabrication parameters on the deformation behaviour of the preform of metal-matrix composites during the squeeze-casting processes 241
C.G. Kang, Y.H. Seo (Pusan, South Korea)

Metal drawing by means of solid soap films 250
J. Eickemeyer, H.-R. Vogel, J. Reichert, M. Rehm (Dresden, Germany)

A generalised solution for the prediction of springback in laminated strip 254
W.Y.D. Yuen (Port Kembla, NSW, Australia)

A fracture condition based on the upper bound method for the extrusion of bimetallic tubes 265
J.L. Alcaraz (Bilbao, Spain), J. Gil-Sevillano, J.M. Martínez-Esnaola (San Sebastián, Spain)

Limits of lubrication in backward can extrusion: analysis by the finite-element method and physical modelling experiments 275
B. Bennani (Valenciennes, France), N. Bay (Lyngby, Denmark)

The role of voltage pulse off-time in the electrodischarge machined AISI T1 high-speed steel 287
O.A. Abu Zeid (Al Ain, United Arab Emirates)

Interface surface behaviour in the upsetting of sandwich metal sheets 292
N.D. Lukaschkin, A.P. Borissow (Moscow, Russian Federation)

The change in the fractal dimension of the shape of the cavities during the superplastic deformation of duralumin LY12CZ 298
M. Li, S. Wu (Xi'an, People's Republic of China)

Numerical simulation of the arc pressure in gas tungsten arc welding 302
H.G. Fan, Y.W. Shi (Xi'an, People's Republic of China)

A piezoelectrically driven micro-positioning system for the ductile-mode grinding of brittle materials 309
J.-D. Kim, S.-R. Nam (Yusong, South Korea)

Preface 321
A. Świątoniowski (Cracow, Poland)

Directions in investigations into the dynamic phenomena of rolling mills 323
W. Dobrucki, A. Świątoniowski (Cracow, Poland)

Changes in roll-gap shape in the case of vibrations in a four-high rolling mill stand 328
W. Dobrucki, A. Bar (Cracow, Poland)

Theoretical description of the continuous (tandem) rolling mill 338
R. Gregorczyk (Cracow, Poland)

Experimental investigation on the states of strain and stress occurring in the metal during the continuous tube-rolling process 347
P. Sobkowiak (Cracow, Poland)

Interdependence between rolling mill vibrations and the plastic deformation process 354
A. Świątoniowski (Cracow, Poland)

Mathematical model of the transfer of the excitation of vibration between adjacent rolling stands of continuous group 365
R. Gregorczyk (Cracow, Poland)

Theoretical study of the dynamic effect on the warping of rolled strip and loss of flatness 373
A. Świątoniowski (Cracow, Poland), P.F. Thomson (Melbourne, Australia)

Equations of strip equilibrium during asymmetrical flat rolling 382
J. Mischke (Cracow, Poland)
